Using the CP Plus ezyFi Camera

3MP Camera for Vivid Video

Designed to represent an enhanced picture quality in 3MP camera so that every detail can be viewed with vivid clarity and a pixilated video feed can be avoided.

Full-Color Night Vision

The Full Color camera captures every detail in vivid, natural tones, even in the darkest hours. Unlike traditional cameras that switch to black-and-white, it delivers clear recognition of faces, clothing, and surroundings round the clock. With true color imaging 24x7, it ensures smarter, more reliable, and more confident security for any environment.

Human Body Detection

Designed to provide human detection and intelligent alerts, which means only being alerted only when the need occurs as the camera detects people as opposed to animals, passing vehicles, or other inanimate moving objects.

View & Talk

Enables you to stay in touch with your loved ones from anywhere, meaning you can also talk while viewing the live video feed on the phone.
Built-in Siren

Comes with a built-in siren that activates automatically when suspicious motion is detected, acting as an active deterrent to ward off intruders.

Cloud Recording

Offers secure and encrypted cloud-based video storage, ensuring your recordings are accessible anytime, anywhere, even if the physical camera is tampered with.
